

6GSRWP GLOBAL STANDARD ROTARY WELLPOINT

Global Pump® Standard Rotary Wellpoint pumps are specifically designed for wellpoint and underdrain dewatering applications.

Capable of handling both water and air, Global Standard Rotary Wellpoint pumps automatically prime and reprime without air elimination systems or operator intervention. Ease of application is inherent, as the positive displacement pump automatically develops the discharge pressure required.

The model 6GSRWP is capable of achieving maximum flows of 800 gpm (182 m³/h) and maximum discharge pressures up to 25 psig while handling water, air, and solids up to 1.5" (38 mm) in diameter.

The standard 6GSRWP is powered by a water-cooled, 4-cylinder diesel engine with reduction gearbox. Alternative drives are available, including other diesel engines or electric motor options.

FEATURES

Global Pump's proven Rotary Helical Lobe pump with pulsation-free convoluted, Tri-lobe rotors

Replaceable wearplate for both front covers for extended cover life

Silicon Carbide mechanical seals

Direct drive through a flexible coupling and engine-mounted reduction gearbox

Gearbox technology separates the pump head from the gearbox, eliminating cross contamination between pump media and gearbox lubricant

Large suction and discharge header tanks for easy priming, draining and solids settlings

Recirculation line between header tanks to ensure rotors are always wetted

Standard engine control panel provides preset emergency shutdown protection and allows the addition of automatic level control

Rotors, cover seal and product seals can be accessed for inspection, service or replacement by simply removing the front cover

Standard skid-mounted format with integral fuel tank, tie downs, lifting bail

OPTIONS

Fuel tanks for extended run times and/or remote location as required

Highway trailer with integral fuel cell/chassis, lights, fenders, tie downs, lifting bail, front and rear jacks. Trailer brakes can be offered as required

Sound attenuated enclosure options

Hose racks, accessory containers and other custom features available as required

Wide range of suction and discharge fittings including Global Pump's own "QD" QuickDisconnect fittings and accessories

SPECIFICATIONS

Connections	6" (150 mm) ANSI Flanges
Maximum Pump Speed	600 rpm (300-500 rpm normal operating range)
Maximum Engine Speed	2040 rpm (1020-1700 rpm normal operating range)
Maximum Flow	800 gpm (182 m ³ /h) (107 cfm) of water or air
Water Temperature Limit	140° F (60° C)
Solids Handling Capability	2.5" (63.5 mm)
Maximum Casing Pressure	75 psig (517 kPa)
Standard Compact Fuel Tank	52 gallons (197 liters)
Dry Weight	1,950 lbs.

PUMP MATERIAL

Casing	Cast Iron
Rotors	NBR with cast iron core
Bearing Housings	Cast Iron
Bearing Covers	Cast Iron
Wearplates	Hardox 500
Timing Gears	Case Hardened Steel
Shafts/ Shaft Sleeves	Steel
Seal	Silicon Carbide on Silicon Carbide
Fuel Cell/Chassis	Steel

GPM
